

Frixos was retained by the main developer for the supply and installation of a wide range of structural steelwork, juliet and terrace balustrades, entrance door panels, lift surrounds, grid flooring and staircase wall rails together with a package of other architectural metalwork to this high end apartment building comprising 113 luxury apartments, high quality commercial and office space and basement car parking.

Since 1978, Frixos has specialised in the design, fabrication and installation of all types of structural and architectural steel work.

With an in house team of over 80 experienced and skilled designers, fabricators and installation engineers, we work hand in hand with architects, designers, developers, contractors and other authorities seeking high quality bespoke or innovative metalwork solutions to their project budgets and other specifications.

Based in north London, close to the M25, Frixos serves a wide range of housebuilder, infrastructure and private clients predominately in London and the South East. We place a strong emphasis on service and quality and take pride in the enduring relationships we have built with our clients, suppliers and partners and our ongoing commitment to safety, quality and the development of our people.
